# Celebrating our love for building

ETHIndia is a hackathon — a movement with the goal of inspiring and fostering a community of builders promoting technological advancements for Ethereum. It's a place where the leading minds in the Ethereum ecosystem are uniting with 1500+ builders from around the globe to build decentralized applications for the future. And we invite you to be one of them. Help us build a garden where everyone is self-sovereign, where everyone is an owner, where hierarchies don't exist.
